

SQL Data Analysis

Project 3 — Query Results Screenshots

Database: SalesD | Tool: SQL Server Management Studio (SSMS) | Table: dbo.Sales

Query 1: Total Revenue by Product

Groups all orders by product and calculates total revenue using SUM(TotalPrice). Results show Chair and Printer as top revenue generators.

The screenshot displays the SQL Server Management Studio (SSMS) interface. The main window shows a query titled "Decodlabs Pr...8M7\hp (55)". The query is as follows:

```
-- Total revenue by product
SELECT
Product,
SUM(TotalPrice) AS Total_Revenue
FROM dbo.Sales
GROUP BY Product
ORDER BY SUM(TotalPrice) DESC;
```

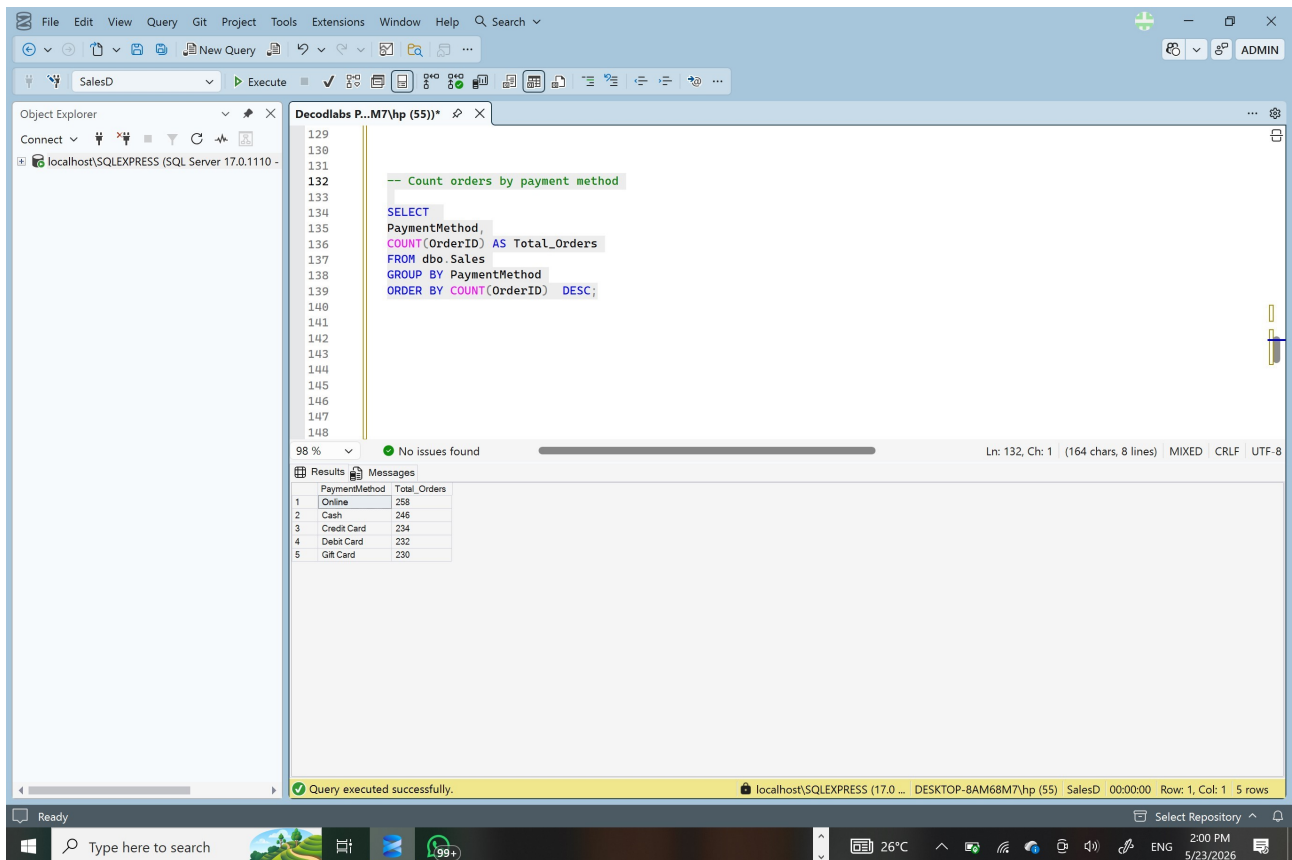

The query results are displayed in a table with 7 rows and 2 columns: Product and Total_Revenue. The results are as follows:

Product	Total_Revenue
Chair	195620.1100
Printer	195612.6100
Laptop	192126.5600
Tablet	186568.9500
Monitor	175651.4100
Desk	167459.9300
Phone	151722.3900

The status bar at the bottom indicates "Query executed successfully." and "localhost\SQLEXPRESS (17.0 ... DESKTOP-8AM68M7\hp (55) SalesD 00:00:00 Row: 1, Col: 1 7 rows".

Query 2: Count of Orders by Payment Method

Counts total orders per payment method using COUNT(OrderID) with GROUP BY. Online payment leads with 258 orders.

The screenshot displays the SQL Server Enterprise Manager interface. The main window shows a query titled "Decodlabs P...M7\hp (55)" with the following SQL code:

```
-- Count orders by payment method
SELECT
PaymentMethod,
COUNT(OrderID) AS Total_Orders
FROM dbo.Sales
GROUP BY PaymentMethod
ORDER BY COUNT(OrderID) DESC;
```

The query results are displayed in a table with the following data:

PaymentMethod	Total_Orders
Online	258
Cash	246
Credit Card	234
Debit Card	232
Gift Card	230

The status bar at the bottom indicates "Query executed successfully." and "localhost\SQLEXPRESS (17.0 ... DESKTOP-8AM68M7\hp (55) SalesD 00:00:00 Row: 1, Col: 1 5 rows".

Query 3: Average Order Value by Product

Calculates average order value per product using AVG(TotalPrice). Laptop has the highest average at \$1,110.56.

The screenshot displays the SQL Server Enterprise Manager interface. The 'Object Explorer' on the left shows the connection to 'localhost\SQLEXPRESS (SQL Server 17.0.1110)'. The main query editor window, titled 'Decodlabs P...M7\hp (55)*', contains the following SQL query:

```
-- Average Order value By product

SELECT
Product,
AVG(TotalPrice) AS Avg_Price
FROM dbo.Sales
GROUP BY Product
ORDER BY AVG(TotalPrice) DESC;
```

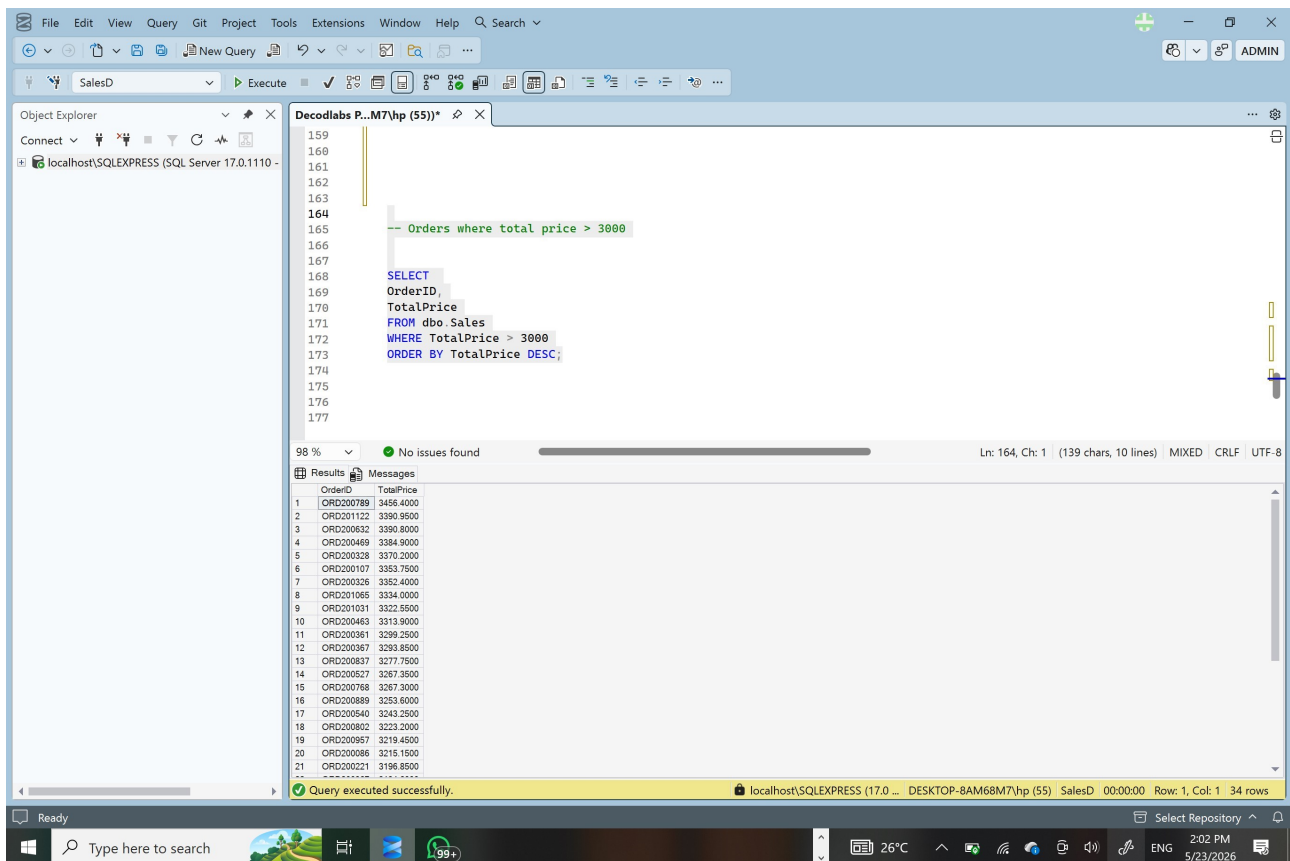

Below the query editor, the 'Results' pane shows the output of the query. It displays a table with two columns: 'Product' and 'Avg. Price'. The results are as follows:

Product	Avg. Price
Laptop	1110.558150
Chair	1098.989382
Printer	1080.732651
Monitor	1077.616012
Tablet	1042.284636
Desk	985.058411
Phone	972.579423

The status bar at the bottom indicates 'Query executed successfully.' and provides additional details: 'localhost\SQLEXPRESS (17.0 ... DESKTOP-8AM68M7\hp (55) SalesD 00:00:00 Row: 1, Col: 1 7 rows'.

Query 4: High-Value Orders (TotalPrice > \$3,000)

Filters orders above \$3,000 using WHERE clause. Returns 34 high-value orders sorted by price descending.

The screenshot displays the SQL Server Enterprise Manager interface. The main window shows a query in the 'Decodlabs P...M7\hp (55)' database. The query is as follows:

```
-- Orders where total price > 3000

SELECT
  OrderID,
  TotalPrice
FROM dbo.Sales
WHERE TotalPrice > 3000
ORDER BY TotalPrice DESC;
```

The query results are displayed in a table with two columns: OrderID and TotalPrice. The results are sorted in descending order of TotalPrice. The first 21 rows are visible, showing OrderIDs from ORD200789 to ORD200221 and TotalPrices ranging from 3456.4000 to 3196.8500.

OrderID	TotalPrice
ORD200789	3456.4000
ORD201122	3390.9500
ORD200632	3390.8000
ORD200469	3384.9000
ORD200328	3370.2000
ORD200107	3353.7500
ORD200326	3352.4000
ORD201065	3334.0000
ORD201001	3322.5500
ORD200463	3313.9000
ORD200361	3299.2500
ORD200367	3293.8500
ORD200837	3277.7500
ORD200527	3267.3500
ORD200768	3267.3000
ORD200889	3253.6000
ORD200540	3243.2500
ORD200802	3223.2000
ORD200957	3219.4500
ORD200086	3215.1500
ORD200221	3196.8500

The status bar at the bottom indicates that the query was executed successfully. The message pane shows 'Query executed successfully.' The status bar also displays 'localhost\SQLEXPRESS (17.0 ... DESKTOP-8AM68M7\hp (55) SalesD 00:00:00 Row: 1, Col: 1 34 rows'.
